

## I. Startup page:

when the user enters the website he/she will be as a default a foreman and needs to login to get to the site engineer properties.

So at first, The Foreman can view the list of all Work orders. He cannot create a new work order.

## II. Work Order Details:

The Foreman can open a Work Order in read only. He can only update the progress in the Items table and save. Once the progress is updated, the values in the progress bar is updated.
